## 2 Introduction

### 2.1 What is Selenium IDE

Selenium IDE (Integrated Development Environment) is primarily a record/run tool that a test case developer uses to develop Selenium Test cases. Selenium IDE is an easy-to-use tool from the Selenium Test Suite and can even be used by someone new to developing automated test cases for their web applications. One does not require any special setup to get started with Selenium IDE. You just need to add the extension of your specific browser. Selenium IDE provides you with a GUI (Graphical User Interface) for easily recording your interactions with the website. [1]

Selenium IDE allows a user or a test case developer to create the test cases and test suites and edit it later as per their requirements. The development environment also provides the capability of converting test cases to different programming languages, which makes it easier for the user and does not mandate the need for knowing a specific programming language.

The screenshot below indicates how the Selenium IDE on Chrome appears after the project name and base URL is entered.

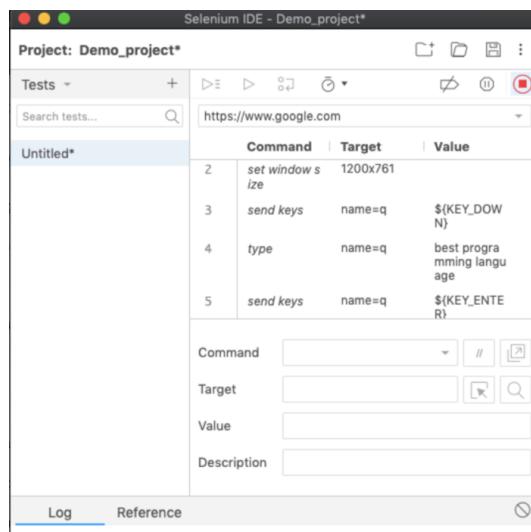

Figure 1: Selenium IDE

After entering the base URL for the project, the recording begins, and all the interactions with the website are recorded and categorized into three main categories as shown in the above Screenshot:

- Command
- Target
- Value

## 2.2 Features of Selenium IDE

There are several features provided in the IDE under the toolbar, using which one can control the execution of test cases:

- Speed Control – Helps control the speed of test cases.
- Run All – Allows execution of the entire Test Suite.
- Run – Runs the currently selected test.
- Pause/Resume – Allows a user to pause and resume a particular test case.
- Step – Helps step into each specific command in the test script.
- Rollup – Helps group all the Selenese Commands together and make them execute as a single operation.

The features keep on getting eliminated or added depending on the usage of different versions of Selenium IDE extensions.

## 2.3 Benefits of Using Selenium IDE

- Provides the capability of automatically recording your test cases based upon the interactions with the browser.
- Gives developers greater flexibility in executing the test cases. Either the test developer can run the entire test suite consisting of multiple test cases or execute a single test case.
- Operates on the basis of the rich set of Selenese commands, which helps the IDE understand what needs to be done
- Allows the test developers to set breakpoints for the purpose of debugging particular test cases
- Test cases can be re-used using the run command.
- Use of multiple-locators for each element in the IDE ensures successful execution.

### 3 How to apply

- Installing Selenium IDE

Open Firefox(or Chrome), download the IDE from the SeleniumHQ downloads page. After installing the add-on, we need to restart the browser. After Firefox reboots we find the Selenium-IDE listed under the Firefox Tools menu.

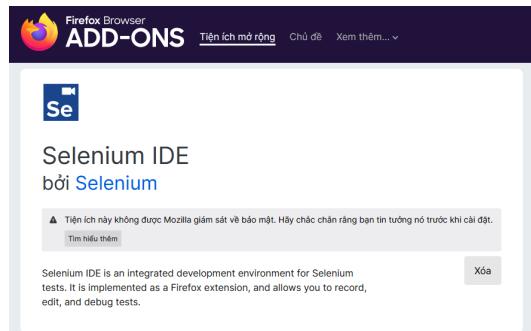

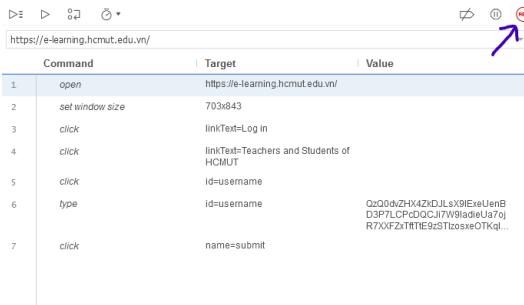

Figure 2: Selenium extension

- Recording Test

To start recording, click the “Start Recording” button and go through the steps of your application . The IDE automatically insert commands in the test case based on our actions. We can view the list of commands in the test case panel. After we gone through steps in testing, we close the browser and click "Stop Recording". We also can reorder the commands or edit the values in the test case.

Command	Target	Value
1 open	https://e-learning.hcmut.edu.vn/	
2 set window size	703x943	
3 click	linkText:Log In	
4 click	linkText:Teachers and Students of HCMUT

7 click	name=submit	

Figure 3: Recording Button

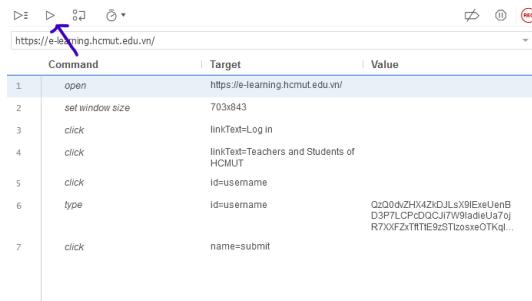

- Running Test

The Base URL field at the top of the Selenium-IDE window is very useful for allowing test cases to be run across different domains. By changing the URL to point to beta or prod environments, the tester can playback the same test on respective environments.

To play/run the test, simply click the “Run” button. We can control the speed of the test by adjusting the speed control slider. As soon as the test starts running, we can see the commands getting executed in orderly fashion. When the test is running, we also can pause/stop the test at any step and start playing again.

We can see error and information messages showing the progress in the Log pane automatically. These messages are often useful for test case debugging.

The screenshot shows the browser's developer tools with the Log pane open. The URL in the address bar is `https://e-learning.hcmut.edu.vn/`. The Log pane displays the following test automation logs:

Command	Target	Value
1	open	<code>https://e-learning.hcmut.edu.vn/</code>
2	set window size	703x843
3	click	linkText=Log in
4	click	linkText=Teachers and Students of HCMUT

#### 4.1.2 Search 1 Char

The screenshot shows the 'GLOBAL SEARCH' page. At the top, there is a search bar with the placeholder 'No results'. Below the search bar, there is a section titled 'Tim kiếm' (Search) with a dropdown menu. Inside the dropdown, there is a search input field containing the letter 'a', a help icon, and a question mark icon. To the right of the search input field is a dropdown menu set to 'Everywhere you can access'. Below this section, there is a 'Filter' button. Further down, there is a note about mandatory fields and a row of filter buttons labeled 'All', 'Course content', 'Courses', and 'Users'. The 'All' button is currently selected.

This is when a student clicks on a video to watch.

#### 4.3.2 Alternative flow

The screenshot shows a web page titled "COMPUTER NETWORKS (CO3093)\_VIDEO". At the top, there is a navigation bar with links: TRANG CHỦ, TRANG CỦA TÔI, KHOÁ HỌC CỦA TÔI, BKEL CỦ, KHÓA HỌC, and a search bar. Below the navigation bar, there are tabs: Khoa học, Danh sách thành viên, Điểm, and Competencies. A dropdown menu is open under "Khoa học", showing "CO3093: Computer Networks (Computer Communications and Networking)". Under this dropdown, there are two sections: "TRANG Description" and "TRANG Books and references". The "Description" section contains a brief course introduction and a list of topics. The "Books and references" section lists required and other textbooks.

## 4.4 Security

### 4.4.1 Basic flow

Figure 25: Basic flow

This is when a student enters username and password correctly, the system lets them in.

#### 4.4.2 Wrong password

The screenshot shows the Central Authentication Service login page. At the top, there is a blue header bar with the BK logo and the text "Central Authentication Service". Below the header, there is a message box with a red exclamation mark icon and the text: "The credentials you provided cannot be determined to be authentic." The main form area has fields for "Username" (containing "hguyen.ngoquang111") and "Password". To the right of the form, there are sections for "Languages" (Vietnamese, English), "Please note" (explaining single sign-on), "Technical support" (with email and phone number), and a checkbox for "Warn me before logging me into other sites". At the bottom left, there is copyright information: "Copyright © 2011 - 2012 Ho Chi Minh University of Technology. All rights reserved. Powered by Jasig CAS 3.5.1".

## 4.7 Login

For each test case, I follow steps, type username and password as specified in .xls file. The test result is as expected in all test cases.

The screenshot displays two windows side-by-side. On the left is the 'Selenium IDE - BTEL TESTING' extension interface in Mozilla Firefox. It shows a list of test cases under 'Project: BTEL TESTING'. One test case, 'BV001\*', is selected and expanded, showing its individual steps: 1. open https://e-learning.hcmut.edu.vn/, 2. setWindowSize 703x843, 3. click linkText:Log in, 4. click linkText:Teachers and Students of HCMUT, 5. click id:username, 6. type id:username with the value QzQ0dVZHX4ZkDlLsX9lEveUsnB D3P7LCPdQClj7W9slieUs7oj R7XXFZtTfIE9zSTtzosxeOTKq..., and 7. click name:submit. The status bar at the bottom indicates 'BV001 completed successfully'. On the right is a browser window titled 'Central Authentication Service' showing the login page. The page has fields for 'Username' and 'Password', both containing placeholder text. Below the fields are 'Languages' (Vietnamese, English) and a 'Please note' section with instructions about single sign-on. At the bottom right is a 'Login' button.
